

## CERTIFICATIONS

### TECHNOLOGICAL PRODUCT

Consolidated certification of technical and operational advantages: CLASSFIBER.® guarantees advantages regarding maintenance, robustness, hygiene, adaptability, reversibility, protection and eco-compatibility.

Simplified planning and technology at the service of the environment: CLASSFIBER.® guarantees advantages in planning and implementation. *We put the experience, you put the taste!* *We're at your disposition for consultancy, suggestions and/or discussion.*

Unlimited artistic versatility: CLASSFIBER.® adds functionality and taste to certified and guaranteed innovation. *Each job is a project in its own right and each project is unique because each requirement is unique.*

Value for the building: added.

Living quality: certified.

Guaranteed multiple use: CLASSFIBER.® is the optimal solution for wall finishings, ceilings, floors (ideal for heavily trodden areas), furnishing (such as doors, cupboards, wardrobes, counters, washrooms and corridors) or items in glass.

Unlimited decoration: CLASSFIBER.® enables you to meet every aesthetic need, with unlimited choice.

Suitability for interiors and exteriors: CLASSFIBER.® can be used without limits for any type of application or environment.

Rapid installation – even on existing surfaces.

Unlimited options as covering: CLASSFIBER.® has a structure that can cover perfectly any support (e.g. cement, concrete, stone, drywall, wood, glass, plaster and two-coat plaster walls, tiles, aluminum or melamine).

Reversibility of actions: simplicity of adapting and readapting, in order to re-interpret the space swiftly and easily.

Re-painting even after adaptation or installation: CLASSFIBER.® can be re-painted many times, with no need for removal, either to change the wall color or to refresh the existing color.

Breathable material: CLASSFIBER.® enables wall breathability through its special reticular structure.

Water-repellent and waterproof: CLASSFIBER.® can be combined with WAT® PROTECTION™ WATER specifications, both from the interior and the exterior, for damp environments (such as bathrooms, washbasins, shower boxes, kitchens, gymnasiums, fitness centers or spas).

Fireproof/Self-extinguishing decoration: CLASSFIBER.® is classified under class1 fire reaction as of the Ministerial Decree of 26/06/84 and is certified under class0 as of trial reports issued by laboratories authorized by the Ministry of the Interior.

Guaranteed resistance to color fading: CLASSFIBER.® is backed by the WAT® COLOR™ warranty: 10 years for interiors, 5 years for exteriors (within the color shade, taking into account the direction faced by the external support: NORTH-EAST-SOUTH-WEST).

Sound absorbing: CLASSFIBER.® can be combined, for interiors, with WAT® SOUND™ specifications, classified in class B-s1, d0. WAT® SOUND™ is a wall and ceiling covering formed of honeycomb-structured microcells that answer to the need for sound to be reflected, creating correct reverberation and increasing the purity of the audible frequencies.

Increasing resistance to plaster cracking by consolidating, reinforcing and improving the seismic performance of the non-structural elements to which it is applied. CLASSFIBER.® adapts itself to the cracking and crazing of the plaster: since it is elastic, it protects and improves the uniformity and the performance of the support.

Shock resistance: CLASSFIBER.® guarantees excellent resistance to shocks and abrasions.

Easy maintenance and cleaning: CLASSFIBER.® is perfectly washable and avoids the dangers deriving from the deposit of perishable substances. It also provides notable resistance to deterioration due to salts, domestic detergents, temperature variations and yellowing.

It provides maximum hygiene guarantee, conceived and created especially with a view to hospital spaces, analytical laboratories and medical clinics: CLASSFIBER.® not only guarantees optimal resistance to shocks and abrasions, it is resistant to contamination and does not provide a breeding ground for bacteria and parasites.

### ECOLOGICAL PRODUCT

Technology in the service of the environment: CLASSFIBER.® is an eco-compatible, eco-sustainable, recyclable material, created with natural raw materials.

Strongly non-toxic and antibacterial: CLASSFIBER.® can be neither toxic nor contaminated by biological agents. It is therefore ideal, also and especially, for hospital spaces, analytical laboratories and medical clinics.
